Post - Graduate Institute for Accounting and Financial Studies in brief

Post-Graduate Institute For Accounting and Financial Studies was established under Law No. (33) of 1999 and is associated with University of Baghdad.

It is the first Arab governmental institute for Post - Graduate studies to grant the following certificates:

- 1-A chartered accountant/its holder enjoys all the rights and privileges of a doctorate degree.
- 2-An accountant and administrative/whose holder enjoys all the rights and privileges of a doctorate degree.
- 3-Higher diploma in Banking equivalent to a master's.
- 4-Higher diploma in Taxes equivalent to a master's.
- 5-Higher diploma in Insurance an equivalent to a master's.

Mission:

Post-Graduate Institute for Accounting and Financial Studies are an integrated system of scientific departments. We believe that the financial and accounting industry service is integrated with academic and professional education through :

- 1-Providing distinguished academic and professional education in the financial and accounting fields and keeping pace with the contemporary business environment in line with the requirements of the labor market
- 2-Achieving harmony, cooperation and openness to society to achieve partnership and sustainable development with various sectors in the scientific and professional aspects and to provide them with accounting and financial specializations.

Vision:

Keeping pace with local, regional and global variables in the accounting and financial fields to prepare and qualify a scientifically and practically qualified graduate in accordance with local and international accreditation standards.

Objectives:

- 1-Preparing specialists in accounting majors (legal accounting, cost and administrative accounting) and financial disciplines (banks, taxes and insurance) with a high level and efficiency to meet the society's need of scientifically and .practically qualified staff
- 2-Keeping pace with recent developments in all fields and upgrading them by linking accounting and financial disciplines with the field of work.
- 3-Attracting academic and professional qualified teaching staff and developing their scientific and technological capabilities.
- 4-Developing the administrative staff and working towards implementing electronic governance.
- 5-Development of graduate studies curricula according to global competition standards.
- 6-Adopting contemporary teaching methods that enhance the teaching and learning process and develop students thought and creative research.
- 7-Development and marketing of applied scientific research through contracts with economic units.
- 8-Quality assurance and university performance in accordance with global competition standards.
- 9-Seek to obtain programmatic and institutional academic accreditation.
- 10-Activating international relations and cooperation with universities and scientific institutions with the same accounting and financial specializations.
